

## BEHAVIOUR OF SOME NECTARINE VARIETIES TO MYCOTIC DISEASES

Antonia IVASCU<sup>1</sup>, Dumitra TAMAŞ<sup>2</sup>

**Abstract.**

Resistance of 20 nectarine varieties were studied during three years in an orchard on Prahova region. The diseases observations have carried out on *Sphaerotheca pannosa* var. *Taphrina deformans persicae*, *Stigmina carpophila*, *Monilinia laxa*, *Cytospora cincta* under treatments. Resistance of varieties and correlations of nectarifers glands with the resistance have been observed.

**Key words:** mycotic diseases, nectarine, *Prunus persica*, resistance
