Alexandru CHIUȚĂ,^{***} Simion RĂȘANU

Rezumat. Studiul prezintă fundamentele religioase ale științei (descoperirea adevărului), ale tehnologiei (adevăr aplicat), ale științelor umaniste (interpretarea adevărului), ale comerțului (implementarea adevărului) și ale educației (transmiterea adevărului) – urmărind teme precum: știință și religie, științe fizice, științe ale vieții, miracole ale creației recunoscute de religie, teorii științifice despre creație, constelațiile zodiacale și revelația primordială.

Abstract. In this work the authors present the religious foundations of science (discovery of truth), technology (applied truth), humanistic sciences (interpretation of truth), commerce (implementation of truth), and education (transmission of truth). The following themes are addressed:

- Science and religion: theology, cosmology, supernatural, evolution
- Physical sciences: cosmogony, astronomy, thermodynamics, chemistry-physics
- Earth sciences: geophysics, hydrology-meteorology, geology, paleontology
- Life sciences: biology, anthropology, demographics, linguistics, ethnology
- Religious scientists provide foundations for sciences
- Miracles of creation recognized by religion
- Scientific theories about creation:
 - Principle of cause and effect
 - Principle of leadership
 - First and second laws of thermodynamics
 - Entropy model of creation
 - Increase of entropy in closed and open systems
 - Trinity of the physical universe
 - Religion of stars-classes of spectral variation of stars
 - Diversity and evolution of stars

Zodiac constellations and primordial revelation.

Keywords: science and religion, religious foundations, anthropology

1. INTRODUCTION

In **Universe**, it is an order rule our experience depends of succession of it. The science, scientific research and treasury of knowledge depend of the creative idea. The scientists have to believe, because there is no science without believe. The scientists' believe means believing in what is true. The scientists, using
