Rezumat. *Articolul realizează o comparație între mitul biblic al plăgilor trimise de către Iahve poporului egiptean drept pedeapsă și gravele dezechilibre ecologice („plăgile” epocii moderne, ale industrializării și ale tehnologizării excesive) provocate de comportamentul necontrolat și agresiv al ființei umane. Ultimele sunt înfinit mai grave, din cauza amplitudinii lor fără precedent ce poate conduce chiar la încetarea existenței umane și a vieții pe Pământ.*

Abstract. *Starting from Egyptian Plagues presented in Biblical essay as punishments of Pharaoh and Egyptians, we saw that human being provoked grave plagues through his own uncontrolled behaviour into nature. These plagues are graver, because of their ecological type which could damage both humanity existence and life on Terra. If lands used for agriculture continuing to exploit these soils and the harvests become smaller, if level of phreatic waters is diminished continuously, if lawns become deserts and animals are starved to death, if natural sources of fishes collapsed, if temperatures growing up as a consequence of greenhouse effect, if pollution will not be controlled, if terrorism and antiterrorism will know an exponential development, if aliments will be modify continuously, and if all these will be happen because of uncontrolled human behaviour, than, maybe, we understand that plagues provoked human against nature will be transformed in real wraths.*

Keywords: greenhouse effect, nature, terrorism and antiterrorism

Introduction

Based on Biblical Essay, the creation of human being was a very special creation act. The rest of creation was made based only on God’s Word: „God said and it was done”. But, first of all, the human being was been modelled from dust, in his own image. After that, God spreading His „Devine Breathing” on His creation and The Man became alive. Only in this way we could understand that Man is in God’s own image.

„And God said, Let us make man in our image, after our likeness: and let them have dominion over the fish of the Sea, and over the fowl of the air, and over the cattle, and over all the earth, and over every creeping thing that crept upon the earth” (Genesis, 1, 28).

Although the human body was made from dust, in the same way like the other living things, he received life through „Divine Breathing”, spirit from Holly
