

Foreword

It is unanimously recognized in the scientific world that any field of research - development - innovation is based on documentation and information. The speed of information circulation and knowledge has inevitably led to an increase in the influence of scientific periodicals in relation to books, whether in print or online. The appearance of the *Journal of Knowledge Dynamics*, realized under the care of the Economic, Law and Sociological Sciences Section, under the aegis of the Academy of Romanian Scientists, is a natural action of a scientific community that brings together significant names in the fields of economics, law and sociology.

The main objective of the journal is the dissemination of research carried out primarily by the members of the Economic, Law and Sociological Sciences Section, but it is a publication open to all authors who wish to make known the concerns and results obtained in the scientific field in which they are active and enroll in the fields covered by journal: Economic, Law and Sociological sciences. This scientific section also takes care of another semi-annual publication, *Annals of The Academy of Romanian Scientists – Series on Economy, Law and Sociology*. The publication will continue to appear and maintain its profile, the new journal addressing the specific theme of knowledge management.

The orientation of the new journal towards a particularly topical area of interest in the context of knowledge-based economic and social development, knowledge management, is not only the concern of the members of the section, but also of other researchers working in other fields. Thus, the appearance of the publication is greeted with great interest, both by the scientific community of the Academy, but also by other specialists with similar concerns.

Academy of Romanian Scientists
Journal of Knowledge Dynamics

In this first issue, it should be mentioned that it is to the credit of the leadership of the section that took the initiative to create this journal, to define the orientation of the content and to realize it in practice in online and paper format, and that the publication covers a field that is not sufficiently supported by periodical publications in Romania.

Let's wish the *Journal of Knowledge Dynamics* a long life and much success among researchers at home and abroad!

Doina BANCIU
President of the Academy of Romanian Scientists
